

Garden Safety Maintenance Checklist

Inspect Garden Structures:

Check for loose bolts, rust, or cracks in fences, pergolas, and decks.

Secure Outdoor Furniture:

Ensure tables, chairs, and umbrellas are stable and anchored against strong winds.

Check Wooden Features:

Look for signs of rot, warping, or termite damage and apply protective sealants.

Examine Electrical Installations:

Ensure outdoor wiring is insulated, weatherproofed, and free from exposed or frayed cables.

Test Garden Lighting:

Confirm that all lights are functioning correctly and replace any flickering or broken bulbs.

Monitor Drainage Systems:

Clear gutters, drains, and pathways to prevent water accumulation and soil erosion.

Apply Anti-Slip Coatings:

Treat pathways, patios, and steps with non-slip materials to prevent falls.

Secure Decorative Items:

Anchor planters, sculptures, and garden décor to prevent tipping in high winds.

Protect Against Fire Hazards:

Keep BBQ grills, fire pits, and torches away from flammable materials like dry leaves or wooden structures.

Store Hazardous Materials Safely:

Keep sharp tools, pesticides, and fertilizers in locked or secured storage areas.

Perform Seasonal Safety Checks:

Adjust safety measures according to weather conditions (e.g., winterizing water features or securing structures before storm season).

This actionable checklist ensures year-round garden safety and structural integrity
